Creation and Extinction/90×90cm/Korean Paper, Abacasa Unique Technique/2018

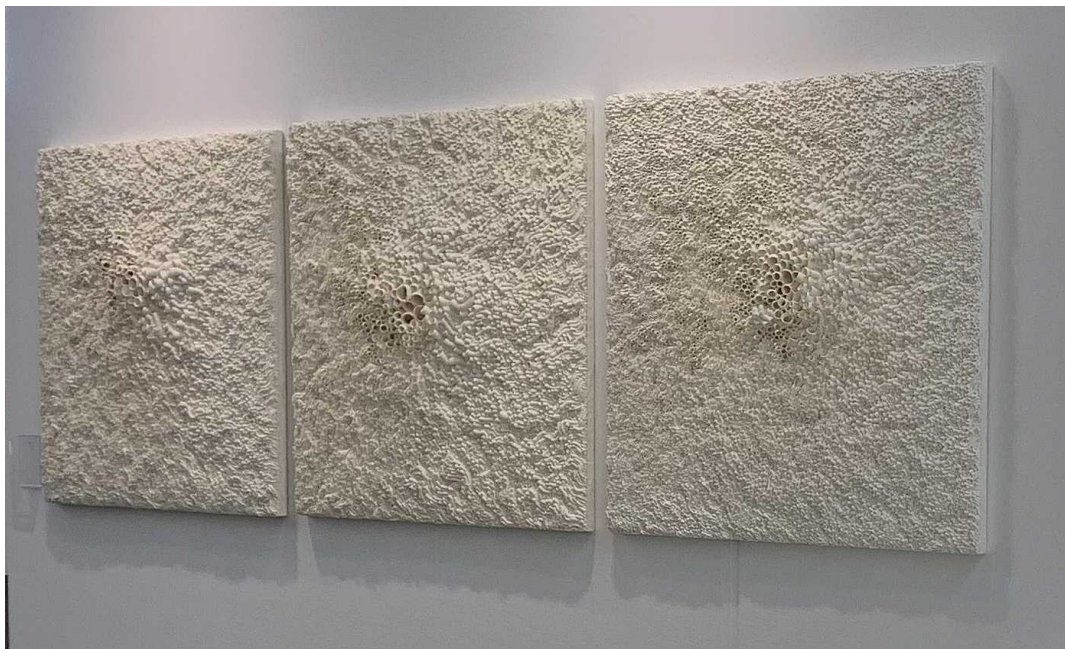

A work explanation

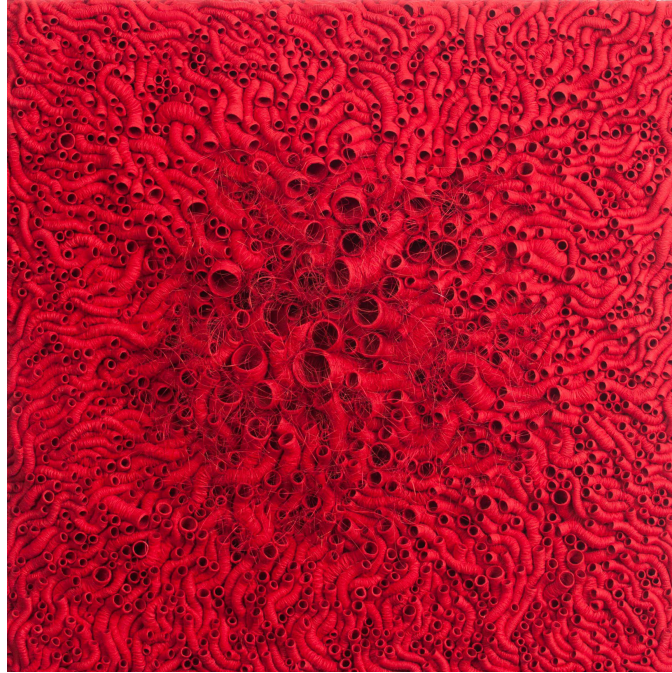

Creation and Extinction are the birth of another life. Using the tough, shrinkable and dilatible properties of hanji, apply moisture and pressure to form temperature. In this way, the seeds of life release energy from Extinction are created.

The universe is an unknown world, expanding and spinning constantly. The human desire for the unknown continues. By burning Hanji's lines to incense, they were converted into three dimensions. In that way, the time-and-space stalemate was expressed, creating a unique universe.
